Versatile Chunky Knitting with Knitmaster's Chunky 151

Knitmaster's Chunky 151 is a 9mm chunky gauge knitting machine. It has 110 big needles — perfectly designed to knit this Winter's fashion yarns — Chenille, Aran, Mohair and a whole range of Chunky yarns — plain, brushed, textured, cotton etc. It comes with its own carry case, a fully equipped tool box, row counter and a fully comprehensive instruction book — ideally suited for beginners and experts alike.

Patterns featured in Knitmaster's 'Chunky Book'.

Add the Chunky Ribber

Add the 150 Chunky Ribber to your Chunky 151 and you can knit lots of different stylish rib fabrics and formations, and many textured stitches, too — including Fisherman's Rib, Tuck Stitch, Slip Stitch and Drive Rib.

Chunky 151 Accessories

The following Knitmaster accessories are suitable for use with Knitmaster's Chunky 151.

- 150 Chunky Ribber
- KR7 Knitrodor

The patterns for the adults' designs illustrated can be found in Knitmaster's 'Chunky Book', while the children's designs can be found in Knitmaster's 'Kiddies' Chunky Book'. Both books are available from your local knitmaster stockist.

Knitmaster's Chunky 151 and Chunky 150 ribber are just what you need to knit this Winter's chunky fashion knitwear. Ask your knitmaster stockist to show you how, today.

FROM THE EDITOR

I had a day out with a difference this month; I went to a party for 5,000 children in Battersea Park! Have you ever seen 5,000 children gathered in one place, never mind at a party? It's a sight to behold! I'll never again complain about being tired after a hectic day at the office — I slept for 3 hours when I got home that afternoon. As a general 'helper' at the party, my duties were quite varied, but manning the Hoopla Stall must have earned me my place in Heaven. 150 children tugging at my sleeve, all eager to win a prize with a well placed hoop — a dozen or so hoops simply weren't enough to satisfy so many children! However, in spite of my exhaustion and frayed nerves, the children had a lovely time and I have to admit to having enjoyed myself in a masochistic kind of way. If you'd like to see a little bit of what went on, you can see it on Aneka Rice's Challenge programme in November. Aneka was challenged to organise the same party in 3 other cities on the same day. I suppose she must have been a bit tired, too!

Anyway, I'm back in our 'tranquil' offices with only a magazine to organise and get to the printers on time — pretty easy stuff, really! This month we've arranged a competition for you so that those of you who've been looking longingly at our 'Making the Most of your Ribber' feature every month can win a Knitmaster ribber with all the trimmings. However, in the meantime, those of you who don't own ribbers can experiment with our article on knitting pleats. We've provided a whole selection of pleat methods which can be knitted on a single bed machine. Pleated skirts are really easy to design and knit, so try out our methods and then knit one to co-ordinate with one of your favourite sweaters — hey presto, a suit!

Must dash now — I've got next month's magazine to organise and get to the printers. Thank goodness it's not another party for 5,000 children!

KNITLINE

Andover, Hampshire

Knitmaster's leading knitting machine expert, Carol Didymus, will be demonstrating all Knitmaster products at the 'County Sewing & Knitting Centre' in Andover on the 7th, 8th, 9th and 10th of November. As many of you will be aware, Carol has been writing our series of articles on using Knitmaster Ribbers and Ribber Accessories and also was the author of our series on knitting 3 Colours in a Row earlier in the year. So, if you live in the Andover area, and have been thinking about buying a ribber or perhaps a Colour Changer, or ever one of Knitmaster's wonderful electronics — in fact, any of Knitmaster's many and varied products, now's your chance to speak to the expert. Carol will be available on 7th, 8th, 9th and 10th November at

No More Eye Strain

With the onset of Winter, we've all started knitting with a vengeance again. But, we've lost those lovely long, light evenings which made knitting and sewing so much easier on the eyes. However,

you can give your eyes a treat this Winter by investing in the 'Daylight Simulation Bulb'. The Daylight Simulation Bulb is made with a natural blue tinted glass which acts as a filter and simulates daylight to the highest degree. It provides a light which is more soothing and relaxing to the eyes than conventional bulbs and is an absolute must when you're working with black wool or doing lots of handwork. The Daylight Simulation Bulb will also allow you to mix and match your colours in the evening rather than having to wait till morning to finalise your colour schemes. And, we all know we're more likely to risk creating a dreadful colour scheme in the evening because we haven't the patience to wait for daylight.

Daylight Simulation Bulbs are available in 60, 75 and 100 watt, bayonet and screw conventional fittings and are best used as a close light source in a lamp. They have a life expectancy of approximately 1,000 hours. Daylight Simulation Bulbs by mail order cost £4.50 (inc p&p) per bulb (minimum order two) or £4 per bulb (inc p&p) for 3-9 bulbs. Send to

Exhibition

'The North of England, Knitting and Needlecraft Exhibition' will be held at the Harrogate Exhibi-

tion Centre on the 7th, 8th and 9th December, 1990. The day will include fashion shows, demonstrations, visiting experts and the chance to see and buy a whole range of knitting machines, accessories, knitting extras and machine knitting yarns. Modern Machine Knitting will also be there to meet you, so do please come and say hello. The doors will be open 10am-6pm each day. Admission on the door is £4 while pre-booked tickets cost £3.

Dust Covers

Quiet a few of you will have already bought fitted dust covers for your machines from Peggy La Riviere. As machines become more sophisticated they deserve more than a dust-harboured old towel thrown over them, and what a good idea to cover the lid too and keep combs and weights free from the fall-out above.

Peggy makes covers for almost all machines now, in a range of colours. The standard machine cover costs £5.75 plus 25p postage. Given the measurements, special covers can be made — oddest request was for a cover for a parrot's cage, royal blue to match his feathers!

New From Hague

Hague, who are famous for their linking machines, have now introduced a more sophisticated linker to suit the needs of those running a small to medium knitwear business — the Hague 460 linking machine. The Hague 460 has an 18" diameter point ring and is available in two gauges — standard gauge (7.P.P.I) and Chunky gauge (4.P.P.I). It is fitted with either a fixed head stand or a swivel head stand. The Hague 460 linker costs £750 (exc. VAT) with fixed head stand or £800 (exc. VAT) with swivel head stand and is available from selected retailers or direct from B. Hague & Co. Ltd. MAKING THE MOST OF YOUR KNITMASTER RIBBER

(Part 6)

For most of us, the next most important and expensive acquisition after our knitting machine, is the ribbing attachment. However, the ribber tends to be the most under used piece of equipment — not that we don't use it all the time, we do, but only for ribbed welts, cuffs and neckbands. The ribber is under used in terms of the many stitch patterns which can be made on it, with or without punchcards. This series of articles is intended to redress the balance by encouraging beginners, and also more advanced knitters, to use the ribbing attachment to its fullest capacity.

Last month we learnt how to knit double Jacquard without using the Colour Changer, using an existing double Jacquard design. This month we're going to knit double Jacquard using the Colour Changer — much quicker and easier than changing colours by hand — and also learn to convert single bed Fair isle designs so they can be knitted in double Jacquard.

USING THE YC5 OR YC6 COLOUR CHANGER TO KNIT DOUBLE JACQUARD

The Colour Changer holds the yarns neatly at the end of the machine, preventing tangles and making it a much smoother and quicker process to knit a garment using 2, 3 or 4 colours.

There are two main parts, the arm which fits onto the end of the machine, and the 4 way auto tension to carry the yarns.

On the first page of the Colour Changer instruction book is a picture of the arm. Please learn the names of the relevant parts, to make it easier to follow the instructions further on.

FITTING THE ARM

Set the arm onto the left hand end of the machine following the fitting instructions in your instruction book. There are two versions of the YC5 instruction book — one is smaller than this magazine, the other the same size, when quoting page nos. we'll specify 'small' YC5 book if there's a difference in the page nos. The instructions for setting the arm on to the machine can be found on 'small' YC5, pages 3 & 4, YC5 & YC6, page 2. YC6 users also note the position of the arm when using the ribber, see diagram 4 page 14.

Leave the auto tension and rod in the box until later.

Attach the ribber arm to the knitter carriage, with the cam lever, as always set to O stockinette.

To operate the driving lever on the ribber arm, see the diagram YC5 page 6, YC6 page 4.

Check that all the holder indicators, on the Colour Changer are lined up in non working pos. 0.

If some are in pos. 1, press the release button and they will drop down to pos. 0.

If one or more is in pos. 2, push the feeding lever sideways to the left, let go, the hooks will then drop back to pos. 1, press the release button to drop them back to pos. 0.

DRY RUN

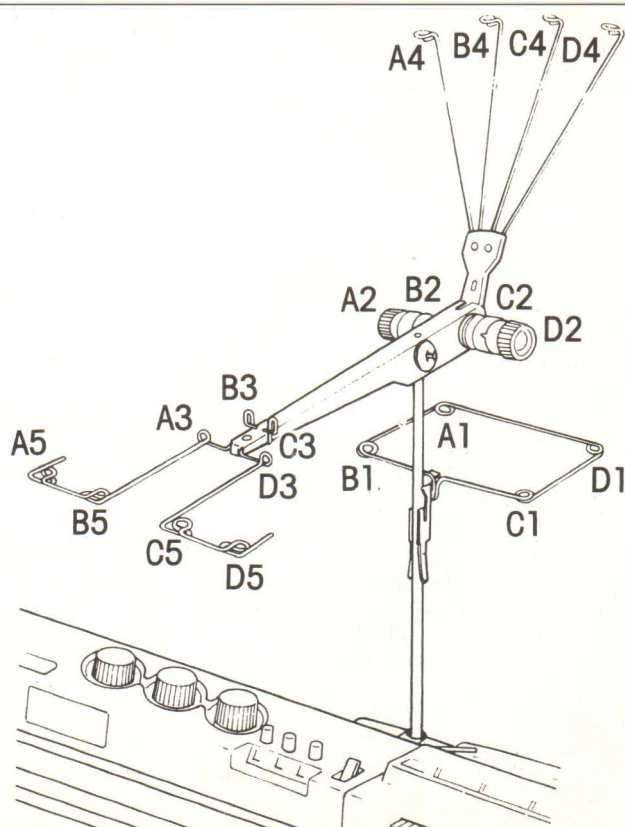

Before fitting the auto tension, we'll do a dry run without yarn and needles.

Have the carr. on the right.

Press holder button A to pos. 1.

Take the carr. from right to left and

Fig. 1

Knitmaster's Colour Changer will change 2, 3 or 4 yarns automatically for you. It makes knitting double Jacquard so quick and easy.

push it smartly into the arm. You will hear a click as the driving lever connects with the feeding lever and pushes it to the left, this in turn pushes up holder hook A to pos. 2.

Take carr. from left to right. Now push up holder button B to pos. 1.

Take carr. from right to left, again smartly into the arm. Holder hook B now rises to pos. 2 and holder hook A is taken back to pos. 1. If you now take the carr. into the arm again you will find that you can change back to holder A and then to B again, without having to push the holder buttons. So, you can see, 2 colour work is totally automatic once you have selected the second colour. To select another colour, press the relevant holder button when the carr. is at the right. The button previously selected to pos. 1 will drop back to 0, leaving the selected button in pos. 1 ready to be picked up.

FITTING THE AUTO TENSION

Punchcard machines.

Set the yarn rod and tension guide as shown, 'small' YC5 page 4, YC5 and YC6 page 3.

Set the 4 way auto tension on top of the yarn rod.

Electronic machines

Set the 4 way auto tension onto the top of the yarn rod which comes with the machine. Fold down the triangular tension guide and pull it around to the front of the yarn rod so it's out of the way. Then clip the 4 way tension guide to the rod as shown.

THREADING UP

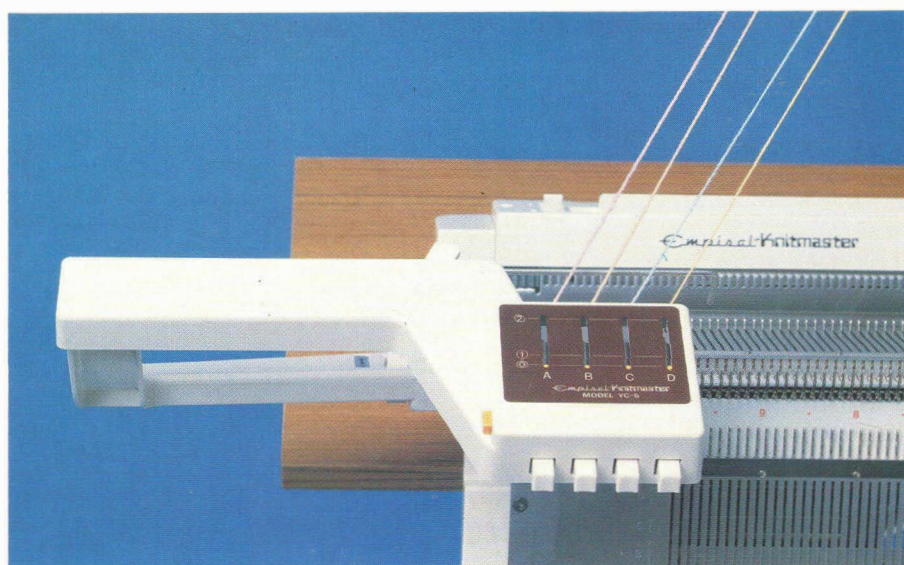

Use a smooth 2 ply yarn, and thread 4 colours into the auto tension following the numbered sequence shown in Fig 1. For instance, thread yarn A up through the hole marked A1, around A2, along to the hole marked A3, up to A4 and back down to A5. Put the yarn end into the clip on the rod until you're ready to use it.

You'll find it easier to thread the colour changer if you drop the ribber bed down. Take all the yarns and tie them together making a loop at the end.

Thread them down between the beds and put the loop around the extreme left hand table clamp.

Now have a look at the colour changer arm. Under the holder hooks is a row of metal notches. Thread main yarn A to the left side of the extreme left hand notch, and into holder hook A. Thread yarn B around the next notch and into hook B, thread yarns C and D in the same manner. Threaded this way you'll never get the yarns in a tangle since the yarns themselves can now be selected in any order without problems.

Make sure that all the holder indicators are on 0.

KNITTING WITH THE COLOUR CHANGER

We're now going to knit with 4 colours but not in double Jacquard yet. Set the machine ready to cast on for full needle rib with carr. on right.

A little tip, bring all needles out to D pos. making sure the russell levers are set to knit them back to B. This avoids all the clonks and bangs that happen when needles are not lined up correctly, and saves unnecessary wear and tear.

Now you have to collect the main yarn, so push holder button A into pos. 1. Take the carr. across to the left and smartly into the arm. The yarn will transfer to the ribber feeder and the holder hook is now in pos. 2.

Now cast on in the usual way and knit a few rows in main yarn. Carriage at Right.

Select colour B by pushing up holder button B. Take the carr. across to the left and smartly into the arm. Colour A will be put back into hook A and will return to pos. 1. Colour B will now be in the ribber feeder and hook B will be in pos. 2. Knit to the right.

With the carr. on the right, push up holder button D. Button A will now drop back to pos. 1 and, if you now knit to the left and change colour, you will have changed the main or background colour. If you now want to carry on knitting stripes in just 2 colours or you're knitting a 2 colour pattern from a Jacquard punchcard, there's no need to touch the holder buttons. They yarns will happily change from D to B and back again automatically. When you want to change to another colour, press the relevant holder button. Carry on practising with a variety of colour sequences, using all the yarns, until you're completely familiar with the different permutations.

POINTS TO NOTE

The auto tension springs are tighter on

the 4 way than the 2 way, to allow for the take up of extra yarn when changing colour. See the guide, 'small' YC5 page 9, YC5 page 5, YC6 page 8.

Also, the tension dial setting will need to be set to a higher number. See 'small' YC5 page 11, YC5 page 5, YC6 page 8.

If, when you change colour the yarn doesn't enter the feeder correctly, or when you change to another yarn they both stay in the feeder together. It may be that you are taking the carr. into the arm too tentatively. Don't be afraid of it! It works much better if you click it in smartly. Or, it may be that the metal strip which protrudes above the ribber arm has become bent out of line slightly. Just finger pressure either way will be enough to put it right.

Don't forget to use the close knit bar.

If you don't want to change colour, but you're using the whole needlebed, drop the driving lever into non working pos.

When you want to change colour in a punchcard pattern, the holder button must be pressed on the row before you want to change. Therefore, you should mark the punchcard 5 rows above the point where you want to change, instead of the 6 rows above as you do on the singlebed. The pre-punched pattern sets have the colour changes marked on them, so if you're not sure what to do, you can check it with one of those.

YC5 owners have a set of punchcards with their Colour Changer whereas YC6 owners don't. This is because the older YC5 Colour Changer was sold when only standard gauge punchcard machines were around. The new YC6 Colour Changer was introduced to cater for several different types of machine — Electronics, Fine Gauge and Standard Gauge punchcard machines, therefore no cards are provided so you can choose the ones which are suitable for your machine.

Making the Most of Your Ribber *continued*

PUNCHING A CARD FOR DOUBLE JACQUARD

Last month we took you step by step through knitting a 2 colour double jacquard pattern, so now you should understand that each colour is knitted separately using the slip stitch setting, and that it takes 2 passes of the carriage to knit 1 complete row. Armed with this knowledge, you should find it quite easy to convert any singlebed card for double jacquard.

Here's how

FIGURE 2

This is the chart for a single bed Fair Isle design which was featured in our July '90 issue. The numbers at the side of the card are to help identify where you are at each stage of marking. We're only going to

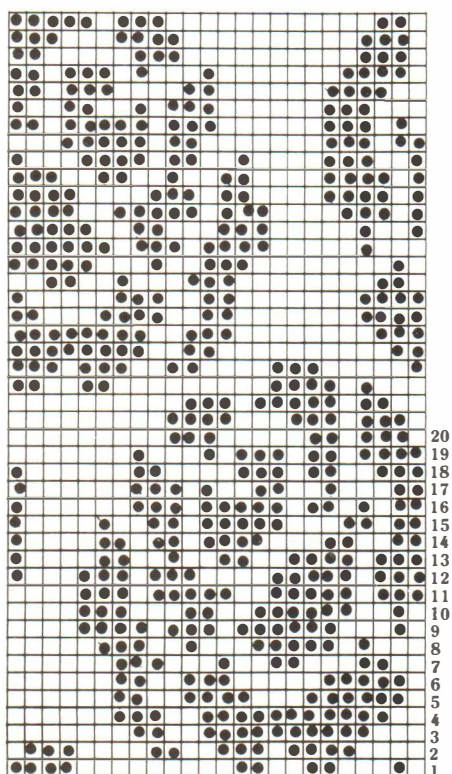

Fig. 2

convert part of this punchcard design, but you should number all of your chosen design.

FIGURE 3

Showing the first 20 rows of the same card, orange is the background shown as blanks on the punchcard. Blue is the contrast shown as holes on the punchcard.

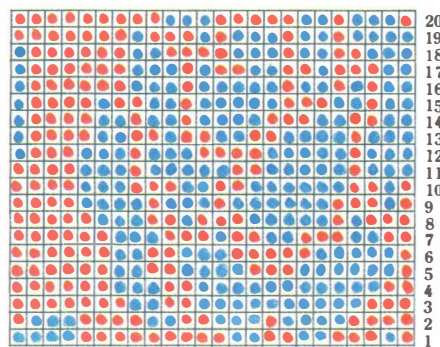

Fig. 3

FIGURE 4

Starting on the *second* row of a blank card, mark the blue (contrast) stitches from the first row of the original card. Continue marking the blue stitches, following the numbers as shown but leaving a 2 row gap after each 2 rows. At the top of the first card you'll have a blank row left. This is correct. Leave it blank for the moment, and take a second blank card to finish marking out the blue stitches from the original card, again starting on the second row as before.

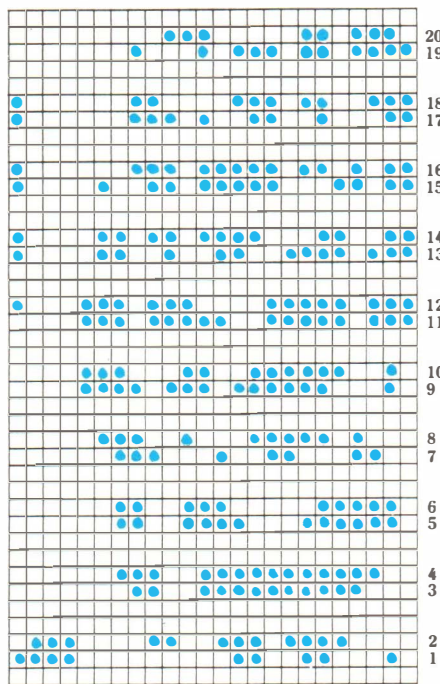

Fig. 4

FIGURE 5

Now fill in the orange (background) stitches from the original card, starting

on the first row and filling in all the blank rows following the numbers as shown. At the end of the second card, finish with the last row of orange stitches, then punch a double row of holes and cut off the excess card.

When the cards are joined together the two orange rows meet, so making 2 rows background (orange), 2 rows contrast (blue) throughout.

Punch holes in your cards where they are marked in orange or blue.

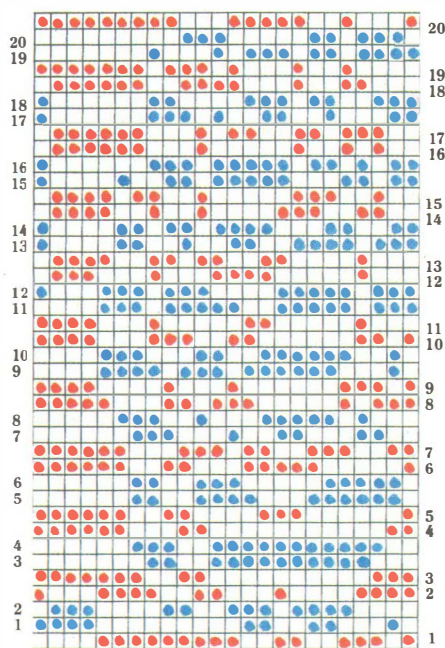

Fig. 5

Note

When you're converting single bed punchcard designs into double jacquard punchcards, you must always start with a design which has an even number of rows. If you don't, the pattern sequence won't be correct when the card starts to repeat from row 1 again. For instance, if we'd worked on a 19 row design, we'd have ended up with one blue row at the end of Fig. 5 and one odd orange row at the bottom, with nothing for either of them to match up with once the card had been clipped together. Double jacquard must always be in blocks of 2 rows. If you do want to convert a single bed design which has an odd number of rows, add an extra row to the original design before you start to convert it. Or, if you like, use the original design twice. That way in a 19 row design becomes a 38 row design.

ELECTRONIC MACHINES

The even row rule does not apply. the machine keeps the colour sequence correct when an odd number row design is used.

Next month, single motifs in double jacquard using the YC5 & YC6 colour changers, and the drive lever on the SRP60 and SRP60N ribbers.

INSPIRATIONAL INTARSIAS

Intarsia knitting is an important feature of modern knitting machines today – whether included as a facility of the main carriage or available as an additional intarsia carriage – and is a really fun way to create unusual and beautifully colourful pictures or geometric designs. Each month we investigate the use of intarsia, providing you with patterns, pictures and above all, inspiration to create your own designs.

INTARSIA TIP

Always check that any intarsia design you're going to knit will fit successfully onto the garment you intend it for. This may sound obvious, but it isn't necessarily quite as straightforward as it may seem. Generally speaking, if the intarsia design has fewer stitches and rows than the garment, then the design should fit. However, this doesn't take into account shapings such as armholes or necklines, which could encroach upon the design. Another point to remember is that, immediately above the ribbed welts and cuffs, several rows of knitting will be pulled in slightly, distorting any design to a certain extent. Therefore, you should consider armholes, ribs and necklines when positioning your intarsia design.

The majority of intarsia designs are most effective when placed in the centre of the garment, but other positions, such as slightly to one side of centre, can sometimes be more effective, depending on the design. Many designs also have small sections which can be taken out of the original design and knitted individually elsewhere on the garment, to give a more complete look. However, the main point to bear in mind is that the design should look balanced when the garment is finished. For instance, an intarsia design with more detail on the left than on the right might look better placed slightly to the left of centre to give the illusion that it has been centrally placed. If you take the time to consider all these things before you start to knit, it will be time well spent.

"AUTUMN GOLD"

Autumn is a favourite time of year for many people, often because of those lovely Autumn smells which are so evocative and nostalgic but also because of the lovely rich colours associated with this season. So, this month's intarsia design incorporates several autumnal tones, with added shine and glitter to give extra richness to the design.

Our 'Autumn Gold' is a good example of a picture knit where you should consider carefully how to place the design on your garment. There are several possibilities. If you look at the chart on

page 12, you'll see that there's more detail in the left half. When we knitted our sample, we moved the whole design 3 stitches to the left, to create the illusion that the design is centrally placed. If you want to do this too, renumber the bottom of the chart, moving centre 'O' 3 stitches to the left. Remember that the knitting is the reverse of the chart if you're comparing them both. This design would also be perfectly acceptable in the centre of your garment because, although the trees are 'heavier' to the left of the chart, the foliage leans to the right, which gives balance to the overall shape. In fact this placing would be particularly effective if the design was continued at the right by extending the ground area and perhaps adding more fallen leaves.

To achieve the same effect as our original sample, use the yarns as detailed below.

FORSELL'S 4ply PURE NEW WOOL

Main Colour: Ivory (100)

Tree trunks: Peat (shade 115)

Foliage: Fellside (shade 153)

Paprika (shade 112)

TWILLEY'S GOLDFINGERING 4ply

(80% Viscose, 20% Metallised Polyester).

Stripes and foliage: Gold (shade 2)

Tree trunks: Copper (shade 9)

MACHINE

Standard gauge with intarsia facility. If the design is to be hand knitted or Swiss darned, the finished design will be the same as shown on the chart and not reversed as with machine knitting.

The design covers 60 stitches and 146 rows.

DECORATION

Our design has been decorated and given added surface interest very easily, by sewing on a few leaf shaped sequins, in a mixture of autumn colours. Should you have difficulty in obtaining autumn coloured leaf sequins, these are available in mixed colours, as used on the Autumn Gold design, at a cost of £1.35 per bag of 50, inclusive of post & packing, from Rosalie Davis, Wayside, Fawkham Road, West Kingsdown, Kent, TN15 6JP. When you've knitted your 'Autumn Gold', compare it with the illustrated sample to see if

you prefer it with or without the leaf sequins. You might even want to leave out the 'sparkle' altogether, in which case the Copper and Gold lurex yarns could be replaced with wools in similar shades. All three tree trunks could be knitted in Peat, with Bumt Amber replacing the gold lurex parts of the design.

ADAPTIONS AND VARIATIONS

To illustrate one possible variation, our original sample has been knitted with bands of gold in decreasing widths beneath the intarsia design. You could also add interest to the rest of the garment by continuing the stripes round the back and front, as well as on the sleeves above the cuffs. Assuming the design is placed on the front of a 4ply sweater which is 210 rows long, the complete design would need to finish at about row 180 to allow for the neck shaping. Since the intarsia design covers 146 rows, this would leave 34 rows at the bottom for the striped area. Therefore, after completing the rib, knit 2 rows Ivory, 6 rows Gold, 2 Ivory, 4 Gold, 2 Ivory, 2 Gold, 8 Ivory and then start the intarsia design. This would leave 10 rows of Ivory before starting the neck shaping.

You might like to edge the welts and cuffs in one of the darker contrast colours (Fellside or Paprika) and, if you're leaving out the gold stripes beneath the intarsia design, fine stripes could also be knitted at intervals in the ribs. If the design is knitted on the back of a garment, pockets could be placed on the front, with a small 'heap' of leaves sewn on the bottom of each pocket.

Whatever you decide to do with our 'Autumn Gold', we hope the lovely rich colours will spread a little warmth!

ZIPPY PLUS ▶

THE STEP BY STEP WAY TO OWN A COMPLETE LUXURY KNITTING SYSTEM

ZIPPY PLUS ▶

A top specification Knitmaster

Zippy Plus is a top specification, standard gauge machine. Its carriage has the full Knitmaster Masterglide action, including Masterglide bearings.

It also has a 24 stitch punchcard system which transfers the pattern through the unique Knitmaster memory drums on the carriage, directly to the needles (no noisy timing belt with this machine).

Zippy Plus has 200 needles and comes with its own carry case, a fully equipped tool box, row counter, 20 punchcards and a fully comprehensive UK produced instruction manual.

Zippy Plus will knit 2ply, 3ply and 4ply plain and fancy yarns.

With Zippy Plus, the cast on is automatic while The Carriage Release Lever will automatically get you out of any jam. And, because Zippy Plus patterns with its needles in lower working position, you need never worry about damaging exposed needles or getting caught up in them yourself.

The one touch stitch selector will produce, fully automatically, the following stitches.

KNITTING FROM NATURE

(Part 9)

OTTERS

Otters are on the endangered species list since their river-bank habitat has become polluted and the fish they live on grow scarce.

These designs, which will make them proliferate at least on knitwear, are knitted in light brown on cream. Swiss dam eyes and noses in black where indicated on the charts. Whiskers, as important to the otter as to a cat, are embroidered with straight stitches in white sewing cotton above eyes and on muzzles, to add a realistic touch.

LETTERS, HINTS & TIPS

If you have an amusing or interesting bit of chit-chat or a helpful hint which you'd like to share with your fellow readers, or perhaps have a question or a problem you think your fellow readers can help with, write to us — we'll send you a £5 reward if your letter is published.

Dear Laraine,

I would be most grateful if you or any of your readers could help me.

I am trying to find a pattern for a basic raglan V neck in 4 ply acrylic in sizes 44"-54".

I am also trying to find a 24 stitch pattern for the Ghost Busters and Slimer for the children's jumpers. So far I have been unsuccessful so I would be most grateful for any help.

Yours faithfully

Mrs. Wendy Cameron, Menstrie, Clacks.

Dear Laraine,

I think this tip will help many knitters. I had to knit two sweaters in a Fair Isle checked pattern. I found casting off and sewing up the double yarn very thick and bulky.

So, when I did the second sweater, I knitted the completed pattern, changed to plain knitting and worked one row with the main colour before casting off.

This made it very easy to sew a neat seam. I also used a same coloured nylon thread with the sewing up wool, which was a Shetland, to give it that extra strength.

I've had my Knitmaster 700K almost 2 years now and don't know why I never had one before.

Yours faithfully

Mrs. M. Hart, Portishead, Bristol.

Dear Laraine,

I felt I must write to you concerning your pattern in the September 1990 issue of Modern Knitting for a 'Green and Gold Fair Isle Suit'. The pattern advises the reader who owns a Knitmaster 580 + Design Controller that she can send for actual sized copies of the design cards to knit the electronic version of the suit. However, the photocopies are not actual size.

I enclose a photocopy of my adaptation of your pattern which may come in useful for some poor soul who, like myself has spent two days trying to fill in a mylar sheet.

Thank you for your time.

Yours sincerely

Trudi Allen, Preston, Lancs.

Dear Trudi,

Thank you so much for taking the time and trouble to write. I was dumbfounded when I checked the design card we've been sending out for pattern no. 10 in the September issue. We'd received both the garment and a copy of the card from our colleagues in Japan and, mistakingly assumed that the card was the correct size. Please accept my apologies for not having taken more care, and my apologies go to everyone else who sent in for the design card.

And, thank you for sending copies of your design cards — I'm sure your fellow readers will be very grateful, as we are. If anyone would like to receive Trudi's actual sized versions of the electronic design cards for the Green and Gold Suit in the September issue please send a sae to Modern Knitting Ltd. P.O. Box 175, Kingston-upon-Thames, Surrey, KT5 6HA.

Once again, my apologies to everyone — we'll do better next time, I promise!

Laraine

Dear Laraine,

In your September issue, Mrs Culley asked for a punchcard design of a rat. Here is my punchcard design for a rat for single bed machines and also a double Jacquard version. You may publish these charts in your magazine if you like, in case any of your other readers would like to knit rats on their knitwear!

With kind regards.

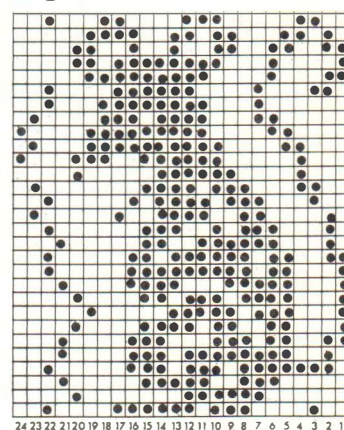

Chris Chapman, Millbrooke Designs, Louth, Lincs.

Dear Chris,

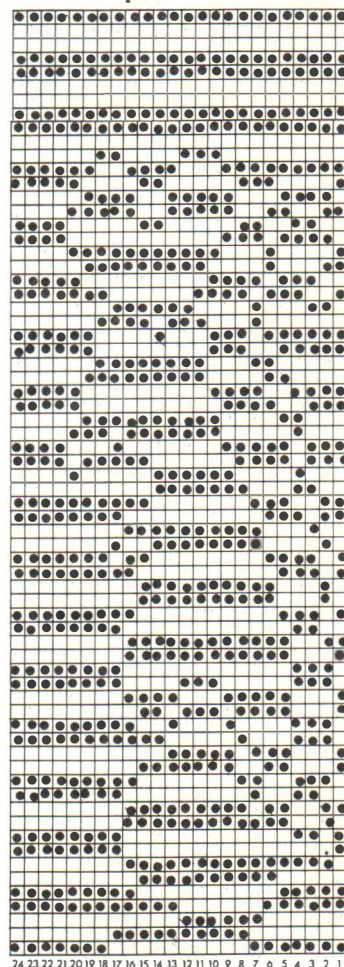

Thank you for your lovely design. Who would have thought a rat could look so cute?

BOLERO SUIT

We normally associate pleats with skirts, but this elegant suit shows that certain types of pleat can be used for other things too. We've used the Shadow Pleat method for this skirt and jacket — you'll find a full explanation of this and other types of pleat on the next page. Before you knit any skirt, you should check that the length is OK for you. In this case, because the skirt is knitted sideways, check the length by looking at the width of the knitting, which is shown at the bottom of the skirt diagram — 64 cms. If you want to make this skirt shorter or longer subtract or add stitches, as appropriate.

For Standard Gauge Machines with Ribbing Attachment.
Knitted on Knitmaster's Zippy Plus.

HOW TO KNIT PLEATS

Did you know that some extremely attractive pleated fabrics can be knitted very successfully on a knitting machine? This month we're going to investigate pleats on a single bed machine and next month we'll knit some on the ribber. Single bed pleats can be created in several ways — either by knitting rows in different thicknesses of yarn, by using a stitch pattern, by varying tensions, or by combinations of needles in working and non working positions.

SIDEWAYS KNITTED PLEATS

Sample 1 Shadow Knitted Pleats

This attractive form of knitting has become very popular, especially for skirts. This is probably because the technique is simple to knit, and yet is very effective. For basic Shadow Knitting you need two different weights of yarn which can be steam pressed — one thick and the other thin. For example, 4ply and 2ply, or 4ply and 1ply. To knit a fabric with a small pleated effect, repeat a sequence of say, 4 rows thick yarn and 4 rows thin yarn for the length required. (See Sample 1). The number of rows between yarn changes can, of course, be varied to give a different size of pleat, such as 10 rows in thick yarn and 2 rows in thin yarn. The purl side is generally used as the right side, and the pleats are formed by the difference in yarn thicknesses. The thick yarn shows on the outside, and the thin yarn is partially hidden between the folds. For speed and simplicity, you can keep the same tension throughout, using the tension which is suitable for the thick yarn. However, it's worth comparing the result if you change the tensions each time you swap over the yarns to see if you prefer the effect.

A colour changer makes life a lot easier if you're using more than one colour or texture of yarn, but if you're working in a single colour, using say 2 strands of 2 ply yarn (= 4ply) for the main yarn, and 1 strand of 2ply (= 2ply) for the thin yarn, place the 2 strands in the same Yarn Feeder for the thick (main yarn) rows, and just remove one of the strands for the thin rows.

Care has to be taken with the final pressing/steaming. The fabric can be pressed out flat, or steamed so that the pleats are closed up together, and for this you may find it worthwhile running gathering threads in and out of the pleats

to draw them up. When steaming, use a damp cloth or steam iron and remember that the weight of the iron must not rest on the actual knitting, and that the fabric should be left to dry thoroughly before handling.

To make a quick skirt, press or steam the straight piece of knitting, shaping it at the same time so that the pleats gradually open out more towards the lower edge, but are closed at the waist. Join the seam, turn a hem at the top, and thread with elastic.

Shaped Shadow Pleats

To reduce bulk at the waist, or to give extra fullness to the lower part of the skirt, instead of just making a straight length of fabric, use short row knitting using Holding Position to knit wedges which will produce a more circular shape. This shaping can be done on both thick and thin rows, or on the thin rows only, depending on the effect you want. The method is the same as if you were knitting a sideways knitted skirt.

Sample 2 Pleats using a Stitch Pattern

A punchcard (or hand selection) is another way to create pleats in knitting. All you need is a simple one row card which has every other square punched out, (eg Knitmaster Card 1) or you can use the 1 x 1 needle pusher to select alternate needles. The card is locked on this row throughout, and the carriage settings changed to pattern either Slip or Tuck between your chosen number of rows of stocking stitch. As an example of how to make the pleats, repeat the sequence of say 10 rows in stocking stitch, then 2 rows in Slip stitch (from the card or hand selected), 10 rows in stocking stitch, and 2 rows in Tuck Stitch (from the card or hand selected). The Slip stitch

rows cause the knitting to fold inwards, and the Tuck stitch rows make the outward folds. (See Sample 2). We've used a contrasting yarn for the Slip and Tuck rows for extra effect. You can use either the plain or purl side as the right side.

If you'd like to use this method to knit Knife pleats which lay flat, knit twice as many plain rows before the Slip rows than before the Tuck rows, eg, 20 rows stocking stitch, 2 rows Slip stitch, 10 rows stocking stitch, 2 rows Tuck stitch.

VERTICALLY KNITTED PLEATS

Pleats using a Punchcard

Pleats using punchcards can be made in vertical knitting as well as sideways knitting. However, whilst a sideways-knitted pleat can have any number of rows between the foldlines, if we use a punchcard for vertically-knitted pleats, we must conform to multiples of the 24 stitch card. Electronic owners and those using hand selection do not, of course, have this restriction.

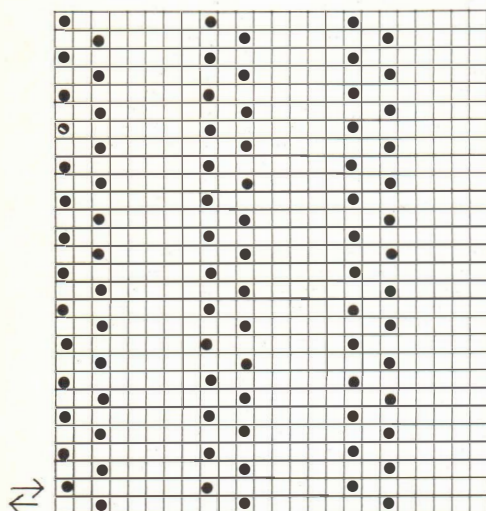

Sample 3 Transfer Lace Pleats

Owners of Knitmaster's Lace Carriage can knit very attractive, fully automatic lace pleats. You can choose how wide you want your pleats to be, provided that for each pleat you allow 3 stitches for the lace pattern "fold lines", and that the total will repeat correctly on the punchcard. Therefore, the pattern which consists of 2 holes separated by one stitch, can have a repeat over say, 6, 8, 12 or 24 stitches. (See Sample 3 and Punchcard chart which are for an 8 stitch repeat). Cast on and knit around 20 rows with waste yarn, followed by 1 row with the nylon cord, before you make an "e" wrap cast on with main yarn. Knit 1 row and then continue with transfer lace.

Knitmaster Lace Punchcard Chart for Sample 3

Sample 4

Knife Pleats using Tuck Stitch

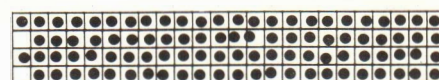

You can knit knife pleats automatically using a combination of Tuck Stitch and a needle in non-working position. The needle in non-working position creates a ladder which forms the inside foldline while the needle which is tucking creates the outside foldline. Punch the card following the punchcard chart. Or, if you prefer, punch only the first row of the chart and leave it locked throughout, but set the carriage so that is patterns in one direction only. This way, the relevant needle will tuck in one direction and knit in the other direction. The chart below shows the needle arrangement for one complete pleat section.

You can use all of these single bed pleat formations to make a whole variety of easy-to-knit pleated skirts. However, you should also consider using them to make interesting features elsewhere on your garments — collars, sleeves, peplums, trims and yokes will all lend themselves to pleat effects.

Next month we'll experiment with a variety of pleat effects knitted using the ribber.

These 22 easy-to-follow patterns with very simple shapes are ideal for the inexperienced knitter. Although produced for the Swissknitter machine, the patterns are suitable for most other machines.

Pattern 2

LADY'S NAUTICAL SWING JACKET

This 'swing' shape is extremely fashionable this Winter so, apart from knitting this lovely jacket, why not use it as the basis for some of your own designs, too. Using your charting device, you can knit it in a variety of yarns, textures and stitch patterns and also adapt the large sailor collar for other collar styles or perhaps vary the jacket length. Take special note of the 'dart' shapings at the hemline. You can see these at the bottom of the diagram for the back and front. It's a long time since we've needed to put darts in knitwear, but they're very important for this style. If you don't have them, the side seams of your jacket will come to a point. To knit them, follow the written instructions and diagram. These will tell you to bring 70(77) needles to Holding Position and then gradually take groups of needles back to Working Position. You have to take the needles back to Working Position using a transfer tool rather than pushing them back to Upper Working Position because you're working in a stitch pattern — a small tuck stitch. This small tuck stitch pattern gives the fabric 'body' while still maintaining the look of stocking stitch on the plain side.

CIRCULAR YOKE CHUNKY SWEATER

This cosy, chunky sweater has been knitted on Knitmaster's new Chunky Electronic. However, we've also included a punchcard chart for those of you with punchcard chunky machines so you can knit a similar sweater on your machines. If you own Knitmaster's Option 4 machine or a Chunky machine without a punchcard, you'll find instructions for your machine in pattern 4. Your version will have plain stripes on the yoke which you can decorate with swiss darning or simply leave as plain stripes.

AUTUMN SWEATER

Co-ordinating flecked yarns with plain yarns is always very effective, especially in the lovely Autumn colours we've used here. We've repeated a section of the border pattern around the neckline, which is an idea you might like to use to make a favourite plain sweater design a bit more special. You can use any border Fair Isle pattern to brighten up a plain sweater since such a small area of Fair Isle won't affect your tension.

THE SWATCH SPOT

For those of you with punchcard machines who would like to knit the sweater on page 41, we've adapted the electronic design to fit into a 24 stitch repeat (see swatch 1). And, by introducing more bright colours into the same Fair Isle design, you can see how many different variations are possible. Swatch 3 creates a more wintry fabric by using black as the background and, in both swatches 2 & 3, the small random patterns have become part of the border design instead of spacing them throughout the garment, as swatch 1 shows. A small amount of Swiss darning on swatches 2 and 3 not only gives the impression of 3 colours knitted in 1 row but also helps the design flow, allowing the carnation stems to 'grow' out of the border.

These two gorgeous designs would cost you a fortune to buy! They'll both take you a bit of time and concentration to knit, but two such beautiful fashion items will be important additions to your wardrobe this Winter. Circular yokes, tassles and snowflakes are all looks of the moment while a parka is an absolute must this Winter.

Pattern A

Pattern B

HOW TO WORK FROM A DIAGRAM PATTERN

The pattern instructions in Modern Knitting are in the form of a diagram pattern, which is by far the easiest form of knitting pattern to use. However, if you are not familiar with diagram patterns, Here's a step by step guide which will teach you to use this easy-to-follow pattern system. **Study the symbols on next page carefully then work through the diagram following the written explanation alongside.** You'll find it quite straightforward and, once you have knitted your first couple of patterns using this system, you'll wonder how you ever coped with those long winded written patterns.

First of all, take a look at the diagram itself. The diagram is divided into two halves. On the right side you'll find all the stitch and row references while on the left side you can see we've given all the measurements which will help you when pinning your knitted pieces out to size. In addition, you'll find certain items of information on the diagram such as the needle arrangement for the rib, the type of cast on you should do and any other relevant information you might need. As you can imagine, once you are familiar with this type of pattern, you'll be able to see at a glance just what's involved in the knitting of each design without having to read the whole pattern.

Starting at the lower edge, your first instruction is $\Delta\Delta\Delta\Delta$ 60S. This tells you to cast on 60 stitches using the ribber.

$|||$ tells you to arrange the needles for a 1×1 rib.

000 at the bottom right hand corner tells you to set your Row Counter to 000.

MT-3 tells you to set your Tension Dial to 3 numbers lower than the Main Tension.

The first row number given is 006, so knit to row 6.

The line across the diagram at row 6 tells you that you have finished knitting the rib, so transfer the stitches from the ribber to the main machine.

000 at the right hand edge tells you to turn your Row Counter back to 000.

MT tells you to set your Tension Dial to the Main Tension. Continue knitting until your next instruction which is on row 40.

The diagram pattern shows you that you are now at the stage for shaping the armholes. **Although the shaping instructions are shown on one side of the diagram only, they should be worked on both sides,**

since the diagram shows there is the same armhole shape on the left side. If you find it easier to begin with, pencil in the same instructions on the left side to remind you that you have only been given the instructions for one armhole.

1S. 1R $\times$ 2 is the instruction.

1S tells you how many stitches to decrease.

1R tells you how many rows after each decrease.

$\times$ 2 tells you how many times to decrease.

Therefore, 1S. 1R $\times$ 2 means:-

Decrease 1 stitch on both sides (you are repeating the shaping instructions for the left armhole). Knit one row.

Decrease 1 stitch on both sides, knit 1 row.

The next instruction is 1S. 2R $\times$ 1. Therefore, decrease 1 stitch on both sides (you are repeating the shaping instructions for the left armhole). Knit 2 rows.

The next instruction is 1S. 3R $\times$ 2.

Therefore, decrease 1 stitch on both sides (you are repeating the shaping instructions for the left armhole). Knit 3 rows.

Decrease 1 stitch on both sides. Knit 3 rows.

Your next instruction is not until Row 68 therefore knit to row 68 without shaping.

The diagram pattern shows you that you are now at the stage for shaping the neck.

The symbol ∇ tells you to divide the work in half and knit each side separately.

Therefore, either push the needles

at left into holding position, or knit them onto waste yarn and remove from the machine. Now knit the right side as follows:-

5 S tells you that 5 stitches form the base of the neckedge.

Therefore, using a length of main yarn, cast off 5 stitches.

Your next instructions are for the neck shaping

2S. 2R $\times$ 1

1S. 2R $\times$ 2

1S. 1R $\times$ 1

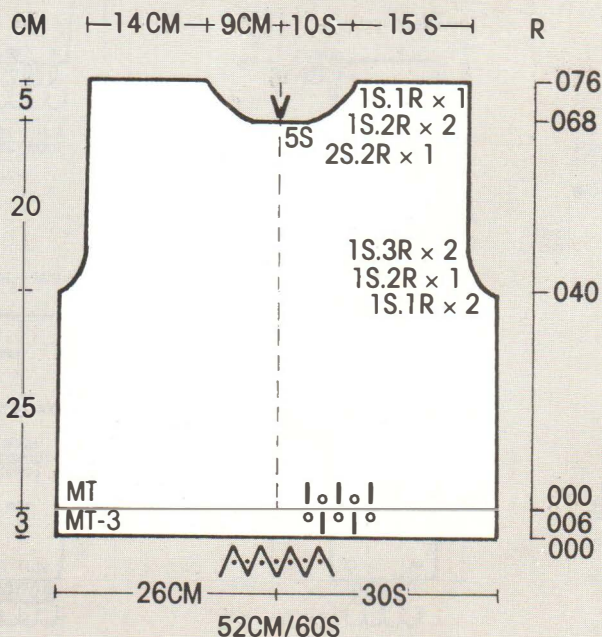

and should be carried out in the same way as before.

The last instruction is on row 76 where the straight line shows you should cast off the remaining 15 stitches.

Then, of course, you must turn the Row Counter back to 68 and knit the left half of the neck in the same way.

For those of you who are new to diagram patterns, the important points to remember are:-

1. The stitch, row and shaping references are on the right half of the diagram.
2. Shaping instructions are given for the right side of the diagram only. They should be repeated on the left if the diagram shows there is the same shape on the left.
3. A shaping instruction such as 2S. 1R $\times$ 3 means decrease 2 stitches, knit 1 row, 3 times in all.
4. Don't worry too much if you find you're the odd row or stitch out on your first couple of attempts. Nobody will notice and you'll soon get the hang of using diagram patterns and wonder how you ever managed without them.

YARNS USED IN THE PATTERNS

For your reference we have included an actual size representation of the yarns we have used in the patterns this month. You may find it useful to see how each particular yarn looks before it has been knitted into a garment and it will be particularly useful when we haven't quoted a brand of yarn, simply a type of yarn. Our overseas readers will also find it helpful since not all the yarns will be available in all countries. However, having said that, it will certainly be worthwhile writing to the spinners listed in our Stockist Information to see if there is an overseas mail order service available.

homecraft exhibitions are now bigger
and better than ever!*

Enthusiasts and novices alike can enjoy our fabulous free fashion shows, a minimum of three each day, consult our resident experts, or trade ideas with visiting designers.

Visit over 150 exhibition stands offering discounted machines and attachments from every major manufacturer, and a few of the lesser known also.

Buy from an Aladdin's Cave of yarns, wools, threads, buttons, patterns, design grids, appliques and accessories – all at reduced prices.

Watch the very best in their chosen fields, demonstrate their particular talents in knitting, sewing, embroidery etc.

For those who would rather let someone else do the work, stock up for Winter from the many ready mades on offer.

Modern Machine Knitting

CHRISTMAS MOTIFS

Our Knitting from Nature feature next month includes some beautiful seasonal robins for punchcard and electronic machines. We'll also provide you with some of our most popular Christmas punchcard designs from previous Christmas issues which are

no longer available. Use our exclusive selection of Christmas motifs to create a whole variety of Christmas knits — seasonal sweaters, Christmas stockings, your own designer Christmas cards, Christmas day table settings and anything else which takes your fancy.

MORE PLEATS

This month we've explored several different ways of

COMING NEXT MONTH

knitting pleats on a single bed machine. Next month we look at a variety of methods for knitting pleats on the ribber. Armed with this information you can choose any of our sweater, jacket or cardigan designs and create an elegant suit by knitting a co-ordinating pleated skirt.

PLUS

All our regular features, hints, tips, techniques and advice — and lots more beautiful designs and patterns for the whole family.

The December issue of Modern Machine Knitting will be in your shops on November 8th. Make sure you don't miss it.

CHUNKY ELECTRONIC SK890

EASY TO USE

Knitmaster's Chunky Electronic SK890 is not only the most sophisticated and advanced chunky knitting machine to date, but is possibly the most easily operated knitting machine you'll ever use.

- Select your chosen stitch pattern at the flick of a lever — stocking stitch, tuck stitch, slip stitch, Fair Isle, punch lace, weaving, single motif, tuck lace and multi-coloured slip stitch and tuck stitch.
- Vary the pattern at the touch of a button — reverse the colours, change the direction, double the length, double the width, mirror the pattern, double the size. And with the unique SK890, all of these variations can be used for single bed or double bed knitting.
- See at a glance the settings on your machine, and change them just as easily. No need for complicated computer programming.

AUTOMATIC CHUNKY KNITTING

Knitmaster's Chunky Electronic SK890 is a top specification, 9mm chunky gauge, electronic knitting machine. Its carriage has the full Knitmaster Masterglide action, including masterglide bearings, for smoother easier knitting. With Knitmaster's SK890, the cast on is automatic while the Carriage Release Lever will automatically get you out of any jam. And, because the SK890 patterns with its needles in lower working position at all times, you need never worry about damaging exposed needles or getting caught up in them yourself. The SK890 comes complete with the EC1 Electronic Pattern Panel and set of pre printed design cards, a fully equipped tool box, row counter, carrycase and a fully comprehensive manual.

SO VERSATILE

Knitmaster's Chunky Electronic SK890 is versatile enough to meet almost any knitting need. Not only can you knit any stitch pattern you choose, quickly and easily, but you can also change from single motif to all over patterning simply by sliding the edge cams. Knitmaster's Chunky Electronic SK890 has 110 big needles — perfectly designed for knitting a whole range of chunky yarns — plain, brushed, textured, cotton etc as well as mohair, chenille and Aran. Use any existing punchcard or electronic design — chunky, fine gauge or standard gauge. Two pattern width dials allow you to select any section of the pattern, quickly and easily. Choose from a 2 stitch pattern repeat up to a 60 stitch pattern repeat.

NOW YOU CAN KNIT A SINGLE PATTERN REPEAT ACROSS THE FULL WIDTH OF YOUR CHUNKY MACHINE

The first of a whole range of machine knitting innovations is here. Plug the PE1 Design Controller into your SK890 and you can produce a single pattern which is 110 stitches wide by 2,000 rows long — or smaller, of course, if you like. The liquid crystal visual display system shows you the card in work and gives you clear and concise instructions whenever necessary. Store as

many designs as you like on blank memory cards or choose from the pre-programmed memory cards which will offer you a whole selection of new designs to knit on your SK890.

Accessories

The following Knitmaster accessories are suitable for use with the new Knitmaster Chunky Electronic SK890.

- 155 Chunky Ribber
- KR7 Knitradar
- PE1 Design Controller
- AG30 Intarsia Carriage
